Animals That Hibernate

To hibernate is to sleep deeply through the cold winter. Read each one aloud.

bear

Sleeps in a den.

groundhog

Sleeps in a burrow.

bat

Hangs in a cave.

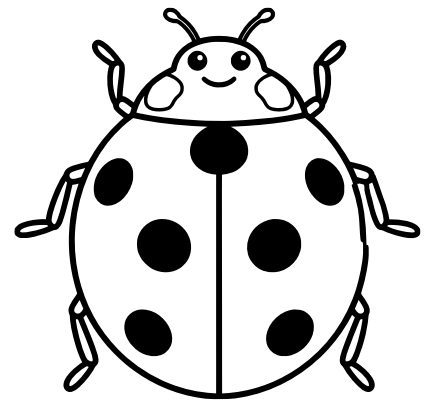

chipmunk

Wakes up to snack.

frog

Sleeps in mud or leaves.

ladybug

Huddles in a group.

READ ALOUD

Before winter, these animals eat lots of food. In their winter sleep they breathe slowly and use very little energy. They wake up in spring.
