

Name _____

Date _____

From Egg to Frog

Read the story aloud. Then read each question and circle the picture.

READ ALOUD How a tadpole becomes a frog

A frog lays lots of soft, jelly eggs in a pond. A tadpole hatches out. It has a long tail for swimming and no legs.

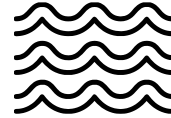

First the tadpole grows back legs. Then it grows front legs and becomes a froglet. Its tail gets shorter and shorter.

Now it is a frog that can hop on land.

- 1 Where are the frog eggs?

desert

pond

tree

- 2 What hatches out of the eggs?

frog

tadpole

froglet

- 3 Which legs grow first?

back legs

front legs

- 4 Which one has a short tail?

tadpole

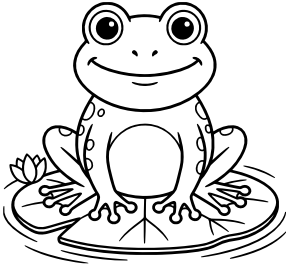

froglet

eggs

From Egg to Frog

The answers are circled.
