

Name _____

Date _____

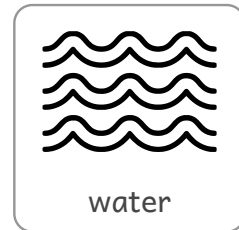

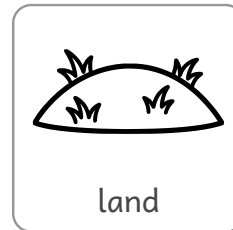

Globe Toss: Land or Water?

Catch the globe. Is your right thumb on land or water? Color one box.

READ ALOUD: HOW TO PLAY

1. Stand in a circle with a soft globe or a blow-up beach-ball globe.
2. Toss the globe to a friend. When you catch it, look at your right thumb.
3. Is your thumb on land or water? Color one box in that row.
4. Toss 10 times. Then count each row and write how many.

Guess first: will you catch more land or more water?

Color one box each time you catch the globe.

land

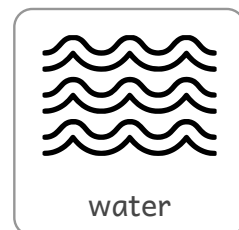

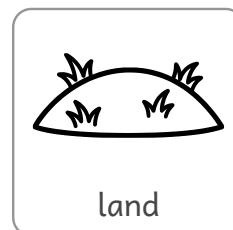

1	2	3	4	5	6	7	8	9	10	
---	---	---	---	---	---	---	---	---	----	--

water

1	2	3	4	5	6	7	8	9	10	
---	---	---	---	---	---	---	---	---	----	--

Which did you catch more?

Most classes catch more water, because about 7 of every 10 parts of Earth are covered by water.
