How Bees Help Flowers

Listen to the story. Circle the picture that answers each question.

READ ALOUD: BUSY BEE

A bee lands on a bright yellow flower. It sips sweet nectar from the middle. Yellow pollen sticks to the bee's fuzzy body. Then the bee flies to another flower, and some pollen rubs off.

Now that flower can make seeds. Bees help flowers, and flowers feed bees!

1. Who visits the flower?

dog

bee

fish

2. Where does the bee fly next?

a car

a bed

a flower

3. What can the flower make after the bee visits?

seeds

rocks

shoes
