Make the Ball Turn

Plan a way to make a rolling ball turn and hit the target.

Read aloud

1. Set a target, like a cup or a block, off to one side of a rolling path.
2. Roll a ball straight. Your child plans something that will make it turn: a book wall, a ruler, a box or a friend's gentle push.
3. Test it 3 times. Ask: Did it hit the target? What could you change?

My plan: draw the ball, the target and what will make the ball turn.

Did the ball hit the target?
