

Name _____

Date _____

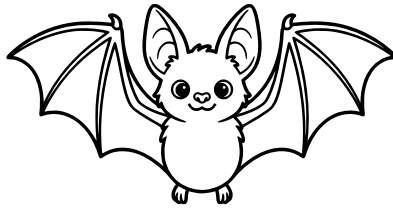

Nocturnal Animals

Nocturnal animals sleep in the day and wake up at night. Read each one aloud.

owl

Big eyes see in the dark.

bat

Listens for echoes.

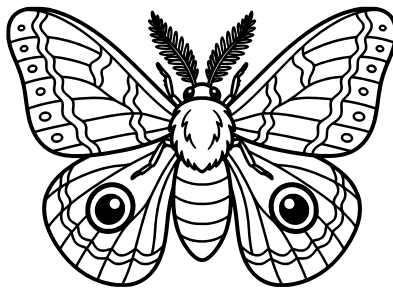

raccoon

Finds food with its paws.

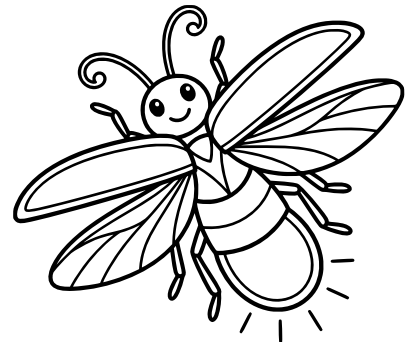

fox

Hears tiny sounds.

moth

Flies to lights at night.

firefly

Flashes a light to talk.

READ ALOUD

At night it is cool and quiet. Nocturnal animals use their eyes, ears and noses to find food in the dark.
