Reduce, Reuse, Recycle

Three ways we can make less trash and take care of the earth.

READ ALOUD

Trash goes to big piles called landfills. When we make less trash, we help the land, the water, the air and the animals. Here are three ways to help.

reduce

Use less. Turn off the water and the lights when you are done.

reuse

Use it again. Carry a cloth bag. Give old toys to a friend.

recycle

Make old things into new things. Put cans, paper and boxes in the recycling bin.
