

Name _____

Date _____

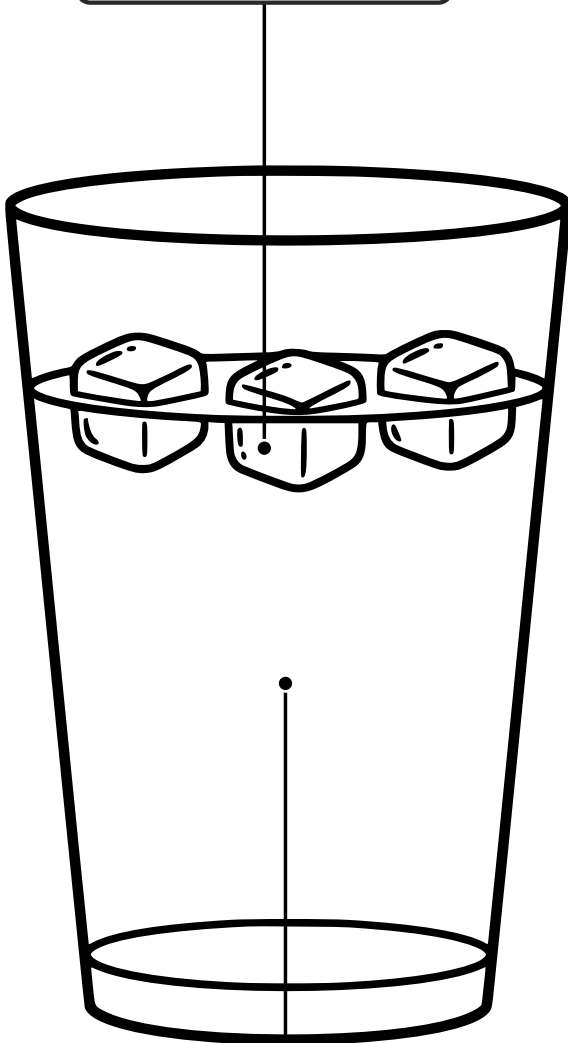

Solid, Liquid, Gas

Water can be a solid, a liquid or a gas.

Read aloud: Ice is water as a solid. The water in the glass is a liquid. When water boils, it turns into steam, a gas.

solid

keeps its shape

liquid

flows and pours

gas

spreads into the air

Read aloud: Look for water around you. Where do you see a solid? A liquid? Steam from a hot pot is a gas. Stay away from hot pots!
