

Name _____

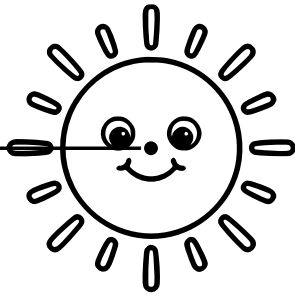

Date _____

Sun, Moon and Stars

In the day we see the sun. At night the sky is dark, so we see the moon and stars.

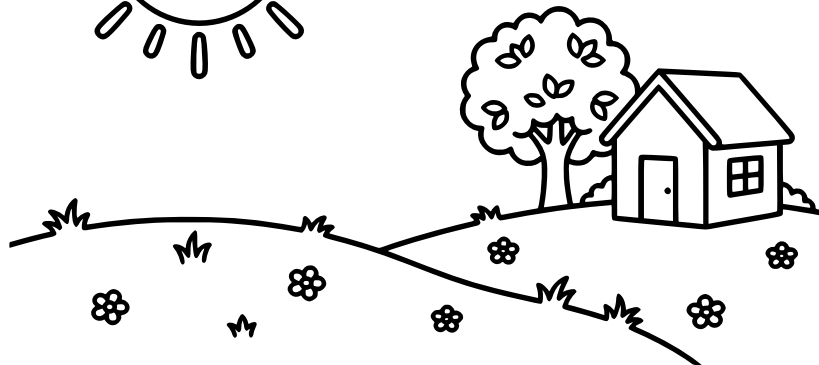

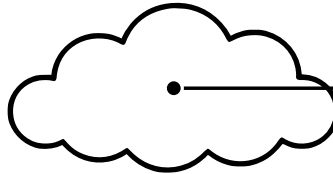

sun

A star. It gives us light and warmth.

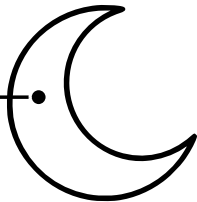

cloud

Tiny drops of water in the air.

moon

It shines with light from the sun.

star

A far-away sun. We see stars at night.

Never look right at the sun. It can hurt your eyes. Sun, moon and star patterns are a first-grade topic; this page is a kindergarten preview.
