# A Raindrop's Trip

Listen to the story. Then circle the picture that answers each question.

## READ ALOUD A Raindrop's Trip

Drip was a drop of water in a lake. One sunny day, the sun warmed the lake. Drip got so warm that she floated up, up, up into the sky. She was too tiny to see!

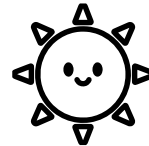

High in the sky the air was cold. Drip joined lots of other tiny drops, and together they made a big gray cloud. The drops bumped and grew. Soon Drip was big and heavy.

Plop! Drip fell down as rain. She landed on a mountain and rolled down a stream, all the way back into the lake. Then the sun came out again...

What warmed the lake?

the moon

the sun

a star

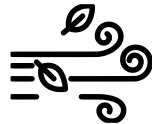

What did the tiny drops make together?

a cloud

snow

wind

How did Drip fall down?

as snow

as rain

as a leaf

Where did Drip go at the end?

back to the lake

a cloud

the sun

# A Raindrop's Trip

Answers: the sun, a cloud, rain, the lake.
